

Here's what other clients are saying:

As your reading for me began to unfold at first I did not even notice; you predicted there would be losses, perhaps deaths, but they would not affect me in a deep emotional way as so many past losses I've been through have. First, my elderly mother died. That loss was expected, and we were never close. You were right on. Then my father passed away. His death was also expected and since we had a difficult relationship, it was actually a relief. I did a lot of internal processing over these losses, but felt no grief, just as you'd said. I always thought astrology predicted the emotional content of our lives, not the physical. You have done both. Thank you for all that you do!

Just thought I would let you know some confirmations following my reading. Sandy, you rock! Thank you for your ability to tune into exactly what is going on around us and help prepare us for all the changes in our lives!

I've been getting one or two readings a year with you since 2002. I recently caught a video of you when you were on the View where you read Whoopie Goldberg. You did a great reading, and came across as composed, knowledgeable, and even comfortable in the spotlight. Congratulations!

Sandy, I am forever grateful for our meeting, your intuitive counseling, and generous participation in my books. You are one of the brightest stars in an infinite sky of light and love.

Trinda Latherow, author of Pieces of the Puzzle

I did just have the loveliest reading with Sandy. I said to Sandy that I would let her know where I discovered her. It was through the John Edward book, "Infinite Quest". I plan to take her advice to get out of my own way to become successful.
